Subject: C&D RECLASSIFICATION

Dear Mr. Sydney;

This letter is in concern to the proposed regulation to reclassify C&D as clean renewable energy. I strongly oppose this change. The potential for lead paint, arsenic, and many other contaminants to be combusted and put into the air for me and my family to breath is incomprehensible. My wife and grandson are asthmatic. As it is the Pioneer Vally has an F rating for air quality. What we need to do is improve that rating not make it worse. I feel that the safety and well being of the citizen would be compromised if this were to go through.

Thank you,

Scott A Loomis
